**#Faiths4ParisAgreement**

# INTERFAITH CLIMATE CHANGE STATEMENT TO WORLD LEADERS

*18th April 2016*

Ahead of the Paris Agreement Signing Ceremony at the United Nations Headquarters on 22nd April 2016, as religious and spiritual leaders, we stand together to urge all Heads of State to promptly sign and ratify the Paris Agreement.

Caring for the Earth is our shared responsibility. Each one of us has a “moral responsibility to act,” as so powerfully stated by the Pope’s Encyclical and in the climate change statements by Buddhist, Christian, Hindu, Jewish, Muslim, Sikh, and other faith leaders [1]. The planet has already passed safe levels of greenhouse gases in the atmosphere. Unless these levels are rapidly reduced, we risk creating irreversible impacts putting hundreds of millions of lives, of all species, at severe risk. The challenges ahead require honesty and courage and we all must take action to reduce emissions.

Humanity is at a crucial turning point. We as faith communities recognize that we must begin a transition away from polluting fossil fuels and towards clean renewable energy sources. It is clear that for many people significant lifestyle changes will have to be made. We must strive for alternatives to the culture of consumerism that is so destructive to ourselves and to our planet.

The unprecedented consensus resulting in the adoption of the Paris Agreement, welcomed by faith communities the world over, has opened up a new path towards a low-carbon, climate resilient transformation of the global economy. The global collaboration by all nations is proof that our shared values are far greater than any differences that divide us. It demonstrates that the sense of collective responsibility shared by all nations and society is far more powerful than the recklessness and greed of the few.

We are united in our support for the full and ambitious implementation of the Paris Agreement and of all other decisions adopted at COP 21. To achieve the 1.5C goal, governments must accelerate climate action before 2020 and also greatly increase the level of ambition of the future Nationally-Determined Contributions (NDCs), rapidly converting them into national policies, law and programmes. These commitments must be defined by increasing ambition outlined in national road-maps on how to transform our societies and economies by 2050 and clearly integrated into national development plans. We recognise the importance of peaking of global emissions by 2020, rapid phasing out of all fossil fuel subsidies and a transition to 100 per cent renewable energies by 2050. Finally, we note that more progress on the scaling up of finance, particularly for adaptation and loss and damage, is required so as to help vulnerable countries better prepare for climate impacts and to help us all in our transformation to a safe, zero carbon future.

Climate change presents our global family with the opportunity to embark on a path of spiritual renewal defined by deeper awareness and greater ecological action. Every act to protect and care for all beings connects us to one another, deepening the spiritual dimension of our lives. We must reflect on the true nature of our interrelationship to the Earth. It is not a resource for us to exploit at our will. It is a sacred inheritance and a precious home which we must protect. United with the

shared hope that arises from faith, we the undersigned believe that the means, desire, and will to care for Earth and all life can and will become action as our political leaders ratify the promises made in Paris - and thus safeguard the greater promises of this generation and of all those to come.

### **We therefore:**

- Urge governments to rapidly sign, ratify and implement the Paris Agreement, and to increase pledges to reduce emissions in line with keeping the global temperature rise to 1.5C above pre-industrial levels;
- Insist on rapid emissions reduction and peaking by 2020, in order to keep the 1.5C limit within reach;
- Strongly advocate the greater flows of finance, especially for adaptation and loss and damage;
- Urge the swift phase out of all fossil fuel subsidies and transition from fossil fuels to 100% renewable energy by 2050;
- Encourage faith communities to reduce emissions in their homes, workplaces and centres of worship and to support and stand in solidarity with communities already impacted by climate change;
- Call for fossil fuel divestment and reinvestment in renewables and low carbon solutions, including within our own communities, and/or by engaging companies on climate change.

### **Signatories**

The Statement was signed by 270 high level faith leaders, 176 different groups and more than 4000 individuals.

The names of the signing faith leaders are in the following pages.

### **About Us**

The drafting and dissemination of the Interfaith Climate Change Statement to World Leaders and the related event on April 18th 2016, have been facilitated by GreenFaith in joint collaboration with representatives from 15 organisations: ACT Alliance, Bhumi Project, Brahma Kumaris World Spiritual University, Catholic Earthcare Australia, Eco-Sikh, Elijah Interfaith Institute, Global Buddhist Climate Change Collective, Global Catholic Climate Movement, GreenFaith, Islamic Relief Worldwide, Lutheran World Federation, Reconstructionist Rabbinical College, Plum Village Community of Engaged Buddhists, United Religions Initiative and World Council of Churches.
